SYLLABUS

UNDERSTANDING CONFLICT AND PLANNING FOR SUCCESSFUL COLLABORATION
Course 1 of 2 in the Fundamentals of ECCR Series

OVERVIEW

Environmental collaboration and conflict resolution (ECCR) requires a broad range of skills and abilities including: understanding the key principles of ECCR; assessing the situation; project implementation and management, communicating effectively to build and maintain working relationships; and finding workable solutions by negotiating from an “interest-based” perspective to satisfy the diverse interests of all parties.

This participatory and interactive course will help develop awareness of the many facets of ECCR including: analyzing, organizing, and determining steps in implementing environmental conflict resolution and collaborative planning processes; fundamentals of interest-based negotiation (IBN); communication skills that help foster long-term collaboration, and available resources. This training exposes participants to the broad range of concepts and skills that one must have to effectively initiate ECCR processes.

LEARNING OBJECTIVES

The objectives for this training include:

- Develop an awareness of the field and practice of Environmental Collaboration and Conflict Resolution
- Learn a framework for an ECCR collaborative decision-making process
- Practice assessing the issues and affected parties to determine if a collaboration and/or conflict resolution process is appropriate for the situation
- Learn effective conflict management concepts, particularly interest-based negotiation
- Understand the different roles in a process, including the functions and responsibilities of the facilitator
- Develop communication skills that help foster long-term collaboration and better manage conflict
